IL CERVELLO IN 30 SECONDI

Confessions of a Dangerous Mind

Brain is the quickest way to understand what's happening inside your head, challenging experts in the field to explain the 50 most mind-blowing theories in neuroscience. Each entry is summarized in just 30 seconds – using nothing more than two pages, 300 words and a single picture. Discover how the networks of 90 billion nerve cells work together to produce perception, action, cognition and emotion. Explore how your brain defines your personality, and what it gets up to while you are asleep. Illustrated with mind-bending graphics and supported by biographies of pioneers in the field of neuroscience, it's the book to get your grey matter thinking about your grey matter.

The editor:

Anil Seth is Professor of Cognitive and Computational Neuroscience and founding co-director of the Sackler Centre for Consciousness Science at the University of Sussex. He has published more than 100 scientific papers and book chapters, has lectured and written widely on neuroscience for a general audience, and his research has been covered in a wide range of media including *The Guardian* and *New Scientist*.
