ALIENI DI PIANURA

Aliens near us! 30 engravings of the “aliens of the plains”, strange beings and mutants born from the imagination of this artist looking from afar to the infinite horizons of the Po Valley.

Denis Riva was born in 1979 in Cento near Ferrara, and has been exhibiting his work since 1997. In addition to being a painter and illustrator, he is a saxophonist with Trabant Mobil, a band which has been working for years in the undergrowth of Italian music scene and has recorded three self-released albums. He also devotes his research to video and installations.
